

Plant name	Common name	Description	Type of plant	Pot Size	Price
<b>Allium ursinum</b>	Wild Garlic/Ramsons	Wild garlic is a bulbous perennial with a rounded head of clear white star-like flowers which bloom between April and June. The leaves are bright green and quite glossy. All parts of the plant have a garlic aroma. Loves a shady spot in a deciduous woodland and quickly spreads to provide a carpet of groundcover in spring. Height: 15-25cm. Clump of 5 bulbs.	Bulb/corm	1L	£5.50
<b>Arum italicum 'Marmoratum'</b>	Italian arum/Lords & Ladies/Cuckoo Pint	Attractive autumn and winter foliage plant with glossy green spear-shaped leaves with a tracery of pale veins. Leaves unfurl in autumn, lasting through winter and into April when they are followed by unusual greenish-white flowers – an upright creamy coloured spadix surrounded by a greeny-white spathe rather like an upturned collar. Stems of orangey-red berries appear above the bare earth in August/September and last through until the new leaves begin to unfurl. Happy in most conditions and will grow in full sun but thrives in rich, damp woodland conditions. Looks good when many other plants are going to bed for winter and will brighten up a dark gloomy corner of the garden. Excellent groundcover but can be slightly invasive. All parts are toxic by ingestion. Height/spread: 30cm x 50cm	Bulb/corm	9cm	£5.00
<b>Berberis darwinii</b>	Darwin's barberry.	This is a dense and upright medium-sized shrub which tolerates most conditions in sun or partial shade. The leaves are glossy and dark green with some spines. Drooping racemes of bright orange flowers appear in the spring followed by dark berries. It sometimes has an autumn flush of flowers. Berberis darwinii is a good specimen shrub but can also be used in a lovely informal flowering hedge. Height: 2m	Shrub	3L	£12.45
<b>Ceanothus thyrsiflorus var. repens</b>	Creeping blue blossom	This Ceanothus is a small but vigorous variety with a low spreading and mound-like habit. Fluffy powder-blue flowers appear in spring/early summer above glossy dark green evergreen leaves. It grows best in a sheltered spot in full sun – ideal trained on a wall. Height: 1-1.5m	Shrub	3L	£9.25
<b>Chionodoxa luciliae 'Alba'</b>	Glory of the snow	Chionodoxa are closely related to Scilla. White star-shaped flowers with pale centres in February/March. They are well suited to rockeries, containers or for planting around the base of a deciduous tree where they will get plenty of light when flowering. Will naturalise quickly in grass provided that you hold off mowing until the leaves die back in early summer. Height -10-12cm	Bulb/corm	9cm	£5.00
<b>Chionodoxa forbesii</b>	Glory of the snow	Chionodoxa are closely related to Scilla. Bright blue star-shaped flowers with pale centres in February/March. They are well suited to rockeries, containers or for planting around the base of a deciduous tree where they will get plenty of light when flowering. Will naturalise quickly in grass provided that you hold off mowing until the leaves die back in early summer. Height -10-12cm	Bulb/corm	9cm	£5.00
<b>Chionodoxa forbesii 'Pink Giant'</b>	Glory of the snow	Chionodoxa are closely related to Scilla. Pink star-shaped flowers with pale centres in February/March. They are well suited to rockeries, containers or for planting around the base of a deciduous tree where they will get plenty of light when flowering. Will naturalise quickly in grass provided that you hold off mowing until the leaves die back in early summer. Height -to 25cm	Bulb/corm	9cm	£5.00
<b>Chionodoxa forbesii 'Rosea'</b>	Glory of the snow	Chionodoxa are closely related to Scilla. Rose pink star-shaped flowers with pale centres in February/March. They are well suited to rockeries, containers or for planting around the base of a deciduous tree where they will get plenty of light when flowering. Will naturalise quickly in grass provided that you hold off mowing until the leaves die back in early summer. Height -10-12cm	Bulb/corm	9cm	£5.00
<b>Choisya x dewitteana 'Aztec Pearl'</b>	Mexican Orange Blossom	An attractive evergreen rounded shrub with aromatic, almost fern like bright green delicate leaves. Beautiful fragrant pink tinged white flowers opening to star-shape often flowering in late spring and repeating in autumn. Tolerates coastal and exposed sites. Shade tolerant, although flowers better if planted in full sun. Height/Spread: 2.5m by 2.5m.	Shrub	3L	£12.95
<b>Choisya ternata 'Sundance'</b>	Mexican Orange Blossom	This golden evergreen rounded shrub has aromatic attractive leaves with a neat, compact habit. Beautiful fragrant white flowers in late spring and repeating in autumn. Ideal in shade, although foliage and flowers perform better in full sun. Tolerates exposed sites and coastal gardens. Height/Spread: 2.5m by 2.5m.	Shrub	2L	£9.25
<b>Cistus x corbariensis</b>	Rock Rose	Evergreen shrub with wavy-edged, wrinkled dark green leaves. In summer it produces masses of dark red flower buds opening to beautiful pure white with yellows centres. Height/Spread: 0.5 – 1m, spread 1 – 1.5m.	Shrub	2L	£11.25
<b>Cornus stolonifera 'Flaviramera'</b>	Yellow Dog Wood	This beautiful yellow/green dogwood, produces stunning yellow/acid green stems which are a lively addition to winter colour in the garden. Deciduous, its lush green foliage turns red in the autumn and white flowers also add spring interest. A good plant to create all round year interest in the garden, tolerating partial shade. Height/Spread: 1.5-2m by 1m.	Shrub	3L	£9.95
<b>Corydalis solida 'Beth Evans'</b>	Solid rooted fumewort	Tuberous herbaceous perennials with attractive fern-like foliage and tubular flowers in erect racemes which appear from March/April onwards. Beth Evans's flowers are sugary-pink. Foliage dies back in midsummer. Corydalis naturalise well and mingle with other woodland plants enjoying full sun or partial shade and rich fertile soil. Height/spread: 20-30cm high and up to 50cm spread.	Bulb/corm	1L	£6.00

Plant name	Common name	Description	Type of plant	Pot Size	Price
<b>Daphne bholua 'Jacqueline Postill'</b>	Nepalese Paper Plant	This beautiful evergreen to semi-evergreen, upright shrub 'Jacqueline Postill' brings gorgeous long lasting scent and cheerful pink/purple colour to the garden from winter to mid spring. It has an upright habit and should be planted in a sheltered spot. Height/Spread: 2.5m by 1m spread.	Shrub	4.5L	£55.00
<b>Eleagnus x ebbingei 'Viveleg'</b>	Ebbinge's Silverberry	A hardy variegated evergreen shrub that has an interesting textured variegated leaf, green and yellow on top with a matt silver underneath. In autumn, very small, but well-scented, creamy-white flowers open, deliciously perfumed. This versatile, shade-tolerant plant It is quite a fast grower with up to 30cm possible annually. It can be planted close to the sea or in a windy spot. Height/Spread: 4m high by 4m spread.	Shrub	3L	£12.95
<b>Eranthis hyemalis</b>	Winter aconites	A member of the buttercup family, these cheerful yellow cup-shaped globes with rag-like ruffs of bright green, are one of the glories of spring. Often one of the first flowers of the year, they are an excellent companion to snowdrops. Height: 15cm. Aconites are corms and are sold in clumps of five.	Bulb/corm	9cm	£5.50
<b>Erythronium dens-canis (Mixed)</b>	Dog's tooth violet	Erythronium dens-canis bulbs are charming and rather showy, often with mottled foliage and solitary nodding flowers with reflexed petals (pink, white or violet shades), rather like a cyclamen. They can cope with most conditions but enjoy sun or partial shade. If left undisturbed they will naturalise well, forming clumps under deciduous trees or shrubs and in rock gardens. Height: up to 25cm	Bulb/corm	1L tall	£6.00
<b>Erythronium dens-canis 'Snowflake'</b>	Dog's tooth violet	Erythronium 'Snowflake' bulbs are charming and rather showy, often with mottled foliage and solitary nodding flowers with reflexed pure white petals, rather like a cyclamen. They can cope with most conditions but enjoy sun or partial shade. If left undisturbed they will naturalise well, forming clumps under deciduous trees or shrubs and in rock gardens. Height: up to 25cm	Bulb/corm	1L tall	£6.00
<b>Erythronium 'Pagoda'</b>	Dog's tooth violet	Erythronium 'Pagoda' bulbs are charming and rather showy, often with mottled foliage and solitary nodding flowers with reflexed canary yellow petals, rather like a cyclamen. They can cope with most conditions but enjoy sun or partial shade. If left undisturbed they will naturalise well, forming clumps under deciduous trees or shrubs and in rock gardens. Height: up to 25cm	Bulb/corm	1L tall	£6.00
<b>Escallonia 'Red Elf'</b>	New Zealand Privet	A small, compact, evergreen shrub with dark small, glossy leaves. Coastal tolerant, this beautiful shrub flowers in summer with a dense covering of dainty clustered red tubular flowers. It will add colour and interest to your garden. Height/Spread: 0.5-1m by 1.5-2m	Shrub	3L	£7.45
<b>Euonymus fortunei 'Emerald Gaiety'</b>	Harlequin Spindle/Winter Creeper/Evergreen Bittersweet	A small evergreen shrub with brightly bi-coloured silver and green leaves, tinged with pink in winter. Will add a splash of all year interest to the garden. Easy to grow in full sun or semi-shade this shrub will 'climb' if planted against a wall or fence. Coastal tolerant, rarely flowers. Height/Spread: 0.5-1m by 1-1.5m	Shrub	2L	£8.45
<b>Euonymus fortunei 'Emerald 'N Gold'</b>	Spindle/Winter Creeper/Evergreen Bittersweet	A small evergreen shrub with brightly bi-coloured, green leaves with gold irregular markings on the edges. Coastal tolerant, excellent as a specimen or a low, informal hedge or a climber. Height/Spread: 1m by 1.5m	Shrub	2L	£6.95
<b>Euonymus fortunei 'Harlequin'</b>	Spindle/Winter Creeper/Evergreen Bittersweet	A small vigorous evergreen shrub with an unusual, speckled, white and green variegated leaves with an attractive pink tinge to the edges in winter. Small flowers can be followed by small colourful fruits. Height/Spread: 0.8m by 0.8m.	Shrub	2L	£6.95
<b>Euonymus fortunei 'Silver Queen'</b>	Spindle/Winter Creeper/Evergreen Bittersweet	A vigorous evergreen shrub suited as an informal hedge or specimen plant. Brightly bi-coloured leaves with an irregular silver margin. Coastal tolerant, grows well in full sun or shade, flowering with small green flowers, occasionally followed by pink berries. Height/Spread: 2m by 2m	Shrub	2L	£6.95
<b>Euonymus japonicus 'Bravo'</b>	Japanese Spindle Bush	An evergreen, dense variegated specimen shrub. Bi-coloured dark green leaves have contrasting vibrant yellow or cream splashes. Coastal tolerant, thriving in full sun or partial shade. Rarely blooms but flowers are small and greenish in colour with pink fruits. Can also be used for hedging. Height/Spread: 2.5-4m by 1.5-2m	Shrub	2L	£6.95
<b>Euonymus japonicus 'Ovatus Aureus'</b>	Japanese Spindle Bush	A medium-sized evergreen specimen shrub with oval leaves which are bright golden-yellow when immature before maturing to a yellow-green with a broad yellow margin. Coastal tolerant, thriving in full sun or partial shade. Rarely blooms but flowers are small and greenish in colour with pink fruits. Height/Spread: 2.5-4m by 1.5-2m	Shrub	2L	£6.95
<b>Galanthus nivalis</b>	Single snowdrop	Beautiful and elegant single snowdrops are scented with teardrop-shaped white bells. Typically flowering between January and April, the inner flower segments are usually marked on their outer surface with a green or greenish-yellow V or U shaped mark over the small notch (sinus) at the tip of each inner segment. The inner surface has a faint green mark covering all or most of it. Height: 7-12cm. Pot of 12 bulbs.	Bulb/corm	9cm	£4.95

Plant name	Common name	Description	Type of plant	Pot Size	Price
<b>Galanthus nivalis 'Cambo Giant'</b>	Extra large single snowdrops - a Cambo Special	Beautiful and elegant single snowdrops are scented with teardrop-shaped white bells. Typically flowering between January and April, the inner flower segments are usually marked on their outer surface with a green or greenish-yellow V or U shaped mark over the small notch (sinus) at the tip of each inner segment. The inner surface has a faint green mark covering all or most of it. These 'Cambo Giant' snowdrops are selected from a particularly vigorous strain of single snowdrops found flowering early in the season in a particular area of the Cambo woodlands to which we return each year to harvest a small number of new bulbs. Pot of 5 bulbs.	Bulb/corm	1L short	£7.50
<b>Galanthus nivalis 'Extra Tall'</b>	Extra large single snowdrops - a Cambo Special	Beautiful and elegant single snowdrops are scented with teardrop-shaped white bells. Typically flowering between January and April, the inner flower segments are usually marked on their outer surface with a green or greenish-yellow V or U shaped mark over the small notch (sinus) at the tip of each inner segment. The inner surface has a faint green mark covering all or most of it. These 'Extra Tall' snowdrops are selected from a particularly vigorous strain of single snowdrops found in a particular area of the Cambo woodlands to which we return each year to harvest a small number of new bulbs. Pot of 5 bulbs.	Bulb/corm	1L tall	£5.00
<b>Galanthus nivalis 'Flore Pleno'</b>	Double snowdrop	Double snowdrops are scented with rosette-like petals inside the flower – almost like tiny roses. They spread vegetatively – as they set no seed – and may bulk up quickly in suitable conditions. Height: 7-12cm. Pot of 12 bulbs.	Bulb/corm	9cm	£5.95
<b>Garrya elliptica</b>	Silk Tassel Tree	A curious leaved evergreen shrub with glaucous leaves above and mealy texture below. The plant itself fades in the summer but in the late winter 'tassles' of flowers which are wind pollinated are distinctive and attractive. Height/Spread: 4m by 2m	Shrub	3L	£12.45
<b>Griselinia littoralis</b>	New Zealand Privet	Apple green glossy leaves are a key distinctive feature of this shrub. Incredibly coastal tolerant and makes a good specimen tree or hedge. Height/Spread: 5m x 4m but can be kept clipped as a much shorter hedge.	Shrub	3L	£12.45
<b>Hamamelis 'Arnold Promise'</b>	Witch Hazel	A gorgeous family of deciduous shrubs with broadly ovate or rounded leaves, sometimes colouring well in autumn, and fragrant yellow spider-like flowers with 4 narrow petals, borne on the leafless branches in late winter and early spring, or in autumn. A beautiful specimen tree for the garden, great winter and autumn interest. Height/Spread: 2-3m by 2m	Shrub	12L	£55.00
<b>Hamamelis 'Diane'</b>	Witch Hazel	A gorgeous family of deciduous shrubs with broadly ovate or rounded leaves, sometimes colouring well in autumn, and fragrant red spider-like flowers with 4 narrow petals, borne on the leafless branches in late winter and early spring, or in autumn. A beautiful specimen tree for the garden, great winter and autumn interest. Height/Spread: 2-3m by 2m	Shrub	12L	£55.00
<b>Hamamelis 'Jelena'</b>	Witch Hazel	A gorgeous family of deciduous shrubs with broadly ovate or rounded leaves, sometimes colouring well in autumn, and fragrant coppery orange spider-like flowers with 4 narrow petals, borne on the leafless branches in late winter and early spring, or in autumn. Hamamelis are also great value to wildlife. 'Jelena' was named in the 1950's by plant breeder Robert de Belder for his wife. A beautiful specimen tree for the garden, great winter and autumn interest. Height/Spread: 2-3m by 2m	Shrub	12L	£55.00
<b>Hebe albicans</b>	White Hebe	This is an attractive and versatile shrub that tolerates a variety of soils just as long as they are not too wet. Ideally plant in full or part sun in a sheltered spot. With white flowers, this shrub is reliable and cheerful at the same time. Height/Spread: 0.1m to 0.5m by 0.5m to 1m	Shrub	2L	£9.25
<b>Hebe rakaiensis</b>	Hebe	H. rakaiensis is a compact, rounded evergreen small shrub to 90cm in height, with small, bright green leaves and short spikes of white flowers from early summer. Height/Spread: 0.3m by 1m	Shrub	2L	£6.75
<b>Hebe vernicosa</b>	Varnished Hebe	A rounded shrub of compact habit, with small, very glossy dark green leaves and axillary racemes of small white or very pale blue flowers in early summer Height/Spread: 0.6m by 1m	Shrub	2L	£8.25
<b>Helleborus x hybridus 'Dusky'</b>		The Harvington hellebores are known for their beautiful large flowers, glossy green foliage and vigour. They are generally best grown in dappled shade in damp but well-drained conditions and should be kept well-watered in the first year. They are heavy feeders and will benefit if mulched with plenty of organic matter and leaf litter. Flowering from December through to March, hellebores provide precious nectar for bees. The leaves are best cut back in late winter to display the new flowers. Height: 40cm. This cultivar is dusky purple colour and has a single flower.	Perennial	2L	£13.95

Plant name	Common name	Description	Type of plant	Pot Size	Price
<b>Helleborus x hybridus 'Lime Double'</b>		The Harvington hellebores are known for their beautiful large flowers, glossy green foliage and vigour. They are generally best grown in dappled shade in damp but well-drained conditions and should be kept well-watered in the first year. They are heavy feeders and will benefit if mulched with plenty of organic matter and leaf litter. Flowering from December through to March, hellebores provide precious nectar for bees. The leaves are best cut back in late winter to display the new flowers. Height: 40cm. This cultivar is lime green colour and has a double flower.	Perennial	2L	<b>£13.95</b>
<b>Helleborus x hybridus 'Lime Single'</b>		The Harvington hellebores are known for their beautiful large flowers, glossy green foliage and vigour. They are generally best grown in dappled shade in damp but well-drained conditions and should be kept well-watered in the first year. They are heavy feeders and will benefit if mulched with plenty of organic matter and leaf litter. Flowering from December through to March, hellebores provide precious nectar for bees. The leaves are best cut back in late winter to display the new flowers. Height: 40cm. This cultivar is lime green colour and has a single flower.	Perennial	2L	<b>£13.95</b>
<b>Helleborus x hybridus 'Picotee'</b>		The Harvington hellebores are known for their beautiful large flowers, glossy green foliage and vigour. They are generally best grown in dappled shade in damp but well-drained conditions and should be kept well-watered in the first year. They are heavy feeders and will benefit if mulched with plenty of organic matter and leaf litter. Flowering from December through to March, hellebores provide precious nectar for bees. The leaves are best cut back in late winter to display the new flowers. Height: 40cm. This cultivar is pale edged in pink colour and has a single flower.	Perennial	1L	<b>£10.50</b>
<b>Helleborus x hybridus 'Pink Double'</b>		The Harvington hellebores are known for their beautiful large flowers, glossy green foliage and vigour. They are generally best grown in dappled shade in damp but well-drained conditions and should be kept well-watered in the first year. They are heavy feeders and will benefit if mulched with plenty of organic matter and leaf litter. Flowering from December through to March, hellebores provide precious nectar for bees. The leaves are best cut back in late winter to display the new flowers. Height: 40cm. This cultivar is pink colour and has a double flower.	Perennial	2L	<b>£13.95</b>

Heralds of Spring - click and collect	Cambo Spring Bulb Selection	A special collection of bulbs from Cambo gardens to herald spring. A pot each of the following - Single Snowdrops (x 12), Double Snowdrops (x 12), Aconites (clump of 5), Snowflakes (pot of 5) - to give your garden some Cambo cheer. Offer Price £19.95	Bulb/corm	9cm pots	£19.95
Hydrangea arborescens 'Annabelle'		Hydrangea arborescens Annabelle produces huge globes of white flowers in abundance, each reaching up to 25cm in diameter in Autumn. This cool white variety produces a magical winter seed head. In autumn, Annabelle will show a spectrum of colour. Height/Spread: 1M BY 1M.	Shrub	4.5L	£21.25
Hydrangea petiolaris		Climbing hydrangea, very useful low-maintenance climbing shrub, perfect for a shady or north-facing wall. It's slow to get going but worth the wait. In midsummer it bears huge, white lacecap-style hydrangea flowers, which can almost completely cover the stems. Loves well-drained soil in shade or partial shade. Plants grow well in sunnier locations but the flowers don't last as well as in shadier sites. Height/Spread: 4m by similar.	Shrub	3L	£11.85

Plant name	Common name	Description	Type of plant	Pot Size	Price
<b>Ilex aquifolium 'Madame Briot'</b>		This is a female holly, an attractive variegated holly with purple stem and spiny green leaves fringed with a golden yellow border. In spring it bears small, white flowers followed in autumn and winter by bright-red berries, very attractive to wildlife. Height/Spread:8m to 12m by 4m to 8m	Shrub	3L	£10.95
<b>Iris histrioides 'Katharine Hodgkin'</b>	Early bulbous iris x 3 bulbs	Iris histrioides are small bulbous perennials with narrow leaves and lovely, intricate and rather startling flowers in early spring, which bloom in February at the same time as crocuses. They can cope with most conditions but thrive in full sun and are a good choice for rock gardens and containers – a doorstep pot filled with these is cheerful reminder that spring is on its way. Known for attracting bees at this time of year. Katharine Hodgkin's flowers are blue with yellow markings.	Bulb/corm	9cm	£5.00
<b>Iris histrioides 'Katharine Hodgkin'</b>	Early bulbous iris x 5 bulbs	Iris histrioides are small bulbous perennials with narrow leaves and lovely, intricate and rather startling flowers in early spring, which bloom in February at the same time as crocuses. They can cope with most conditions but thrive in full sun and are a good choice for rock gardens and containers – a doorstep pot filled with these is cheerful reminder that spring is on its way. Known for attracting bees at this time of year. Katharine Hodgkin's flowers are blue with yellow markings.	Bulb/corm	1L	£6.00
<b>Iris histrioides 'Lady Beatrix Stanley'</b>	Early bulbous iris x 3 bulbs	Iris histrioides are small bulbous perennials with narrow leaves and lovely, intricate and rather startling flowers in early spring, which bloom in February at the same time as crocuses. They can cope with most conditions but thrive in full sun and are a good choice for rock gardens and containers – a doorstep pot filled with these is cheerful reminder that spring is on its way. Known for attracting bees at this time of year. Lady Beatrix Stanley's flowers are bright blue.	Bulb/corm	9cm	£5.00
<b>Iris histrioides 'Lady Beatrix Stanley'</b>	Early bulbous iris x 5 bulbs	Iris histrioides are small bulbous perennials with narrow leaves and lovely, intricate and rather startling flowers in early spring, which bloom in February at the same time as crocuses. They can cope with most conditions but thrive in full sun and are a good choice for rock gardens and containers – a doorstep pot filled with these is cheerful reminder that spring is on its way. Known for attracting bees at this time of year. Lady Beatrix Stanley's flowers are bright blue.	Bulb/corm	1L	£6.00
<b>Iris histrioides 'Sheila Ann Germaney'</b>	Early bulbous iris x 3 bulbs	Iris histrioides are small bulbous perennials with narrow leaves and lovely, intricate and rather startling flowers in early spring, which bloom in February at the same time as crocuses. They can cope with most conditions but thrive in full sun and are a good choice for rock gardens and containers – a doorstep pot filled with these is cheerful reminder that spring is on its way. Known for attracting bees at this time of year. Sheila Ann Germaney's flowers are a clear pale blue.	Bulb/corm	9cm	£5.00
<b>Iris reticulata 'Pixie'</b>	Reticulata irises x 3 bulbs	Reticulata irises are small bulbous perennials with narrow leaves and lovely, intricate and rather startling flowers in early spring, which bloom in February at the same time as crocuses. They can cope with most conditions but thrive in full sun and are a good choice for rock gardens and containers – a doorstep pot filled with these is cheerful reminder that spring is on its way. Known for attracting bees at this time of year. Pixie's flowers are bright violet blue.	Bulb/corm	9cm	£5.00
<b>Iris reticulata 'Purple Hill'</b>	Reticulata irises x 3 bulbs	Reticulata irises are small bulbous perennials with narrow leaves and lovely, intricate and rather startling flowers in early spring, which bloom in February at the same time as crocuses. They can cope with most conditions but thrive in full sun and are a good choice for rock gardens and containers – a doorstep pot filled with these is cheerful reminder that spring is on its way. Known for attracting bees at this time of year. Purple Hill's flowers are deep purple and this cultivar is recommended as a good replacement for the now obsolete but much loved 'George'.	Bulb/corm	9cm	£5.00
<b>Iris unguicularis Marondera</b>		Larger and slightly darker flowering cultivar of this winter flowering iris from Africa. Height 40cm.	Perennial	1L	£8.50
<b>Iris unguicularis Marondera</b>		Larger and slightly darker flowering cultivar of this winter flowering iris from Africa. Height 40cm.	Perennial	2L	£9.50
<b>Leucojum vernum</b>	Snowflake x 12 bulbs	Often flowering slightly later than snowdrops, snowflakes are larger and more robust with strap-like glossy dark green leaves and erect stems with one to two bell-shaped white flowers with green or yellow spots at the tip. These almost resemble a lampshade! Snowflakes are tolerant of most conditions but thrive in full sun. Left undisturbed they will establish rapidly and flower in March to April. Height: 15cm. Pot of 12 bulbs.	Bulb/corm	2L	£23.95
<b>Leucojum vernum</b>	Snowflake x 3 bulbs	Often flowering slightly later than snowdrops, snowflakes are larger and more robust with strap-like glossy dark green leaves and erect stems with one to two bell-shaped white flowers with green or yellow spots at the tip. These almost resemble a lampshade! Snowflakes are tolerant of most conditions but thrive in full sun. Left undisturbed they will establish rapidly and flower in March to April. Height: 15cm. Pot of 3 bulbs.	Bulb/corm	1L short	£6.95

A graceful willow with small grey green male catkins in early spring. Coppice regularly to enjoy the catkins and form of this elegant willow. 2-4m Height/Spread: 1-2m by 2-4m.	Shrub	1L	£9.25

Plant name	Common name	Description	Type of plant	Pot Size	Price
<i>Sarcococca confusa</i>	Christmas box	Christmas box is a slow growing but attractive evergreen shrub with dark green glossy leaves. In winter it bears inconspicuous but highly scented creamy white flowers which are then followed by black berries. Worth planting near an entrance or path. Height: up to 2m but slow growing.	Shrub	3L	£14.45
<i>Sarcococca hookeriana</i> var. <i>digyna</i> 'Fragrant valley'	Christmas Box/Dwarf Sweet Box	Resplendent slow growing evergreen shrub with incredibly scented clustered white starry flowers followed by glossy berries. A valuable addition to the garden Fragrant Valley is a lower growing species with narrower leaves giving the shrub a more dense appearance. These species give all year round interest and significant scented winter interest. Slightly more compact than some other sarcococcas and perfect for smaller borders. Height/Spread: 0.75m by 1m.	Shrub	2l	£9.99
<i>Sarcococca hookeriana</i> 'Winter Gem'	Christmas Box/Dwarf Sweet Box	Resplendent, slow growing dense evergreen shrub, 'Winter Gem' is upright and glossy. Dark green leaves are adorned on pink tinged stems, with highly-scented starry white flowers, open from pinky red buds followed by glossy berries ripening from red to black. Again slightly more compact than other Sarcococcas and perfect for a smaller space. Height/Spread: 0.5-1m by 0.5-1m.	Shrub	2l	£9.99
<i>Sarcococca ruscifolia</i>	Christmas Box/Dwarf Sweet Box	Resplendent slow growing evergreen shrub with incredibly scented clustered white starry flowers followed by glossy scarlet berries. A valuable addition to the garden giving all year round interest and significant scented winter interest. Slightly more compact than some other sarcococcas and perfect for smaller borders. Height/Spread: 0.5m by 0.8m.	Shrub	3l	£14.45
<i>Scilla bifolia</i>	Squill	<i>Scilla bifolia</i> are bulbous perennials with racemes of star-shaped and intensely blue to white flower that appear between January and March. <i>Scilla bifolia</i> will flower earlier than <i>Scilla siberica</i> . They naturalise well in sun or partial shade or grow well at the front of a border, in containers or a rockery. Grow particularly well in light sandy soil. Height: 10-12cm.	Bulb/corm	9cm	£5.00
<i>Scilla bifolia</i> 'Rosea'	Squill	This is the pink form of <i>Scilla bifolia</i> - a bulbous perennial with racemes of star-shaped pink flowers that appear between January and March. <i>Scilla bifolia</i> will flower earlier than <i>Scilla siberica</i> . They naturalise well in sun or partial shade or grow well at the front of a border, in containers or a rockery. Grow particularly well in light sandy soil. Height: 15cm.	Bulb/corm	9cm	£5.00
<i>Scilla mischtschenkoana</i>	Misczenko squill	<i>Scilla mischtschenkoana</i> are bulbous perennials with racemes of star-shaped light blue to white flowers with a dark blue midrib that appear between January and March. They naturalise well in sun or partial shade or grow well at the front of a border, in containers or a rockery. Grow particularly well in light sandy soil. Height: 20cm.	Bulb/corm	9cm	£5.00
<i>Scilla siberica</i> 'Alba'	Squill	A white version of <i>Scilla siberica</i> - a bulbous perennial with racemes of star-shaped white flowers that appear between January and March. <i>Scilla siberica</i> will flower later than <i>Scilla bifolia</i> . Naturalises well in sun or partial shade or will grow well at the front of a border, in containers or a rockery. Grows particularly well in a light sandy soil. Height: 10-20cm.	Bulb/corm	9cm	£5.00
<i>Skimmia japonica</i> 'Rubella'	Skimmia	This popular evergreen shrub is a male plant with glossy, aromatic leaves which have red buds through the winter and fragrant white clusters of flowers in spring. Also useful for pollinating female skimmias close by. Perfect for a partially or fully shady spot in the garden. Height/Spread: 1.2m by 1.2m.	Shrub	2l	£9.95
<i>Skimmia x confusa</i> 'Kew Green'	Skimmia	This popular evergreen shrub is a male plant which bears large clusters of greenish yellow flowers in the spring above glossy green evergreen foliage. It grows well in full or partial shade and will light up a shady corner. Also useful for pollinating female skimmias close by. Height/Spread: 1m by 1m.	Shrub	2l	£9.95
<i>Sorbaria sorbifolia</i>	Sorbaria	Sorbarias are low growing deciduous suckering shrubs with lovely foliage which emerges yellowy-green with a hint of pink in spring and then turns green in summer before colouring red in the autumn. They will tolerate most conditions but a south facing position in the sun will result in the best leaf colour. The flowers are white – rather like a spiraea. Height: 1.5m by 1m	Shrub	3l	£6.95
<i>Sorbus reducta</i>	Dwarf chinese Rowan	This beautiful dwarf rowan is suckering deciduous shrub with glossy dark green pinnate leaves, with clusters of small white flowers in spring. Additional interest comes from pink to white fruits with leaves turn reddish purple in autumn. Full sun to dappled shade for best growth. Height/Spread: 1.5m by 2m.	Shrub	2l	£13.45
<i>Taxus baccata</i>	Yew	Yew is a bushy evergreen species which are incredibly versatile, which can be hedging, topiary or left to grow into a large tree. Grows well in moist but well-drained soil in sun or shade. Height/Spread: 15m x 12m but keep clipped as a hedge or topiary.	Shrub	5L	£19.50
<i>Viburnum x bodnantense</i> 'Charles Lamont'		This beautiful <i>Viburnum</i> is an upright, deciduous shrub, bearing clusters of fragrant, pink flowers on bare stems in winter. Thrives well in a sheltered sunny site, place near to a path to make the most of the fragrant flowers. Height/Spread: 2m by 1.5m.	Shrub	3L	£12.45

Plant name	Common name	Description	Type of plant	Pot Size	Price
<b>Viburnum davidii</b>	David's Viburnum	An evergreen shrub with leathery dark green leaves with prominent veins which grows in a dome-like shape. Flattened heads of flowers appear in April/May followed by black glossy metallic like berries. Grows well in full shade, partial shade and full sun, very versatile. Height/Spread: 1m to 1.5m.	Shrub	3L	£9.25
<b>Viburnum tinus</b>	Lauristinus	This evergreen Viburnum has dense dark foliage with dome-shaped and highly scented white flower clusters which open from pink buds between December and May. These are followed by dark blue-black fruit. It is an easy to grow shrub which will brighten up a dark area and provide a good backdrop for other feature plants. A reliable grower in dappled shade, full shade, full sun. Versatile, it can be used as a specimen shrub or an ornamental hedge. Also tolerates coastal exposure. Height/Spread: 3m by 3m.	Shrub	2L	£9.95
<b>Viburnum tinus 'Eve Price'</b>	Lauristinus	This evergreen Viburnum has dense dark foliage with dome-shaped and highly scented white flower clusters which open from pink buds between December and May. These are followed by dark blue-black fruit. It is an easy to grow shrub which will brighten up a dark area and provide a good backdrop for other feature plants. This cultivar is similar to the species but tends to be more compact. Height/Spread: 1.5-2m by 1.5-2m.	Shrub	2L	£9.95
<b>Viburnum x bodnantense 'New Dawn'</b>	Bodnant viburnum	This is a lovely shrub for the winter. Although deciduous it is covered in clusters of fragrant rose tinted flowers in the winter. To full appreciate the scent, plant it near an entrance or path in the sun. The leaves are dark green and heavily veined. Height/Spread: 1.8-2m by 1.5m.	Shrub	2L	£23.95
<b>Viburnum plicatum f. tomentosum 'Mariesii'</b>	Japanese Viburnum/Lace Cap Viburnum	This shrub/small tree has textured, dark green foliage with large white lacecap spring flowers. The leaves extend seasonal interest in autumn becoming red-purple. It's versatile growing as a specimen shrub and a lovely addition to a Japanese garden design. Height/Spread: 4m by 3m.	Shrub	3L	£12.45
